Final exam - Announcement

The final exam on "Optimization Methods in Finance" will take place at **27.01.09, 11:00h-13:00h in room MA A1 10.** Be there by 10:50h.

- Allowed utilities: Pen, something to eat/drink, (non programmable) pocket calculator
- Not allowed: Books, any sheets of own paper, notebooks, cellphones, ...
- For the exam you need a pen with a color ≠ red. Don’t use a pencil.
- We do not tolerate cheating. If we observe you, using any forbidden utilities or communicating with each other, you instantly fail the exam.
- Please leave your jackets and bags at the door or at the border of the room.
- Choose your seat s.t. there is at least one free seat between you and your neighbour.
- Please bring your Camipro card for identification purpose.
- Principally all content of lectures and/or tutorials is relevant. Exceptions are: The Knapsack approximation algorithm (slides 146-148) and Benders decomposition (slides 166 - 169). We recommend also to be familiar with simple proofs of fundamental results, stated in the lecture.
- Duration of the exam will be 120 min.
- You can reach up to 80 points, corresponding to the 40% weight which the final exam contributes to the total amount of points. Thus another 60 points can be reached by practical exercises and 60 points were reachable in the midterm exam. You need in total 120 points (= 60% of 200 points) to pass the course.

Good luck.
